## Cash, Cash Equivalents and Investments

### As of December 31, 2019

#### Cash and Cash Equivalents

WCHCC's cash and cash equivalents policies are governed by state statutes. Funds must be deposited in Federal Deposit Insurance Corporation ("FDIC") insured commercial banks or trust companies located within the state. Certain funds deposited with banking institutions exceed FDIC limits; however, WCHCC has a collateralization agreement with its depository institutions which management believes reduces the risks related to these balances to a minimal level. WCHCC's cash balances are collateralized under a third party custodian agreement.

At December 31, 2019, cash and cash equivalents consist of cash and all highly liquid instruments with maturities of three months or less at the date of purchase. Approximately 74% of cash and cash equivalents reside with a major financial institution at December 31, 2019.

#### Investments

WCHCC's investments consist primarily of equities and fixed income holdings, which are stated at fair value in the Statement of Net Position.

#### Deposits and Investments

Deposits and investments consist of the following at December 31, 2019 (amounts in thousands):

	<b>2019</b>
<b>Description</b>	
Bank deposits	\$ 91,070

	\$ 279,739

	<u>2019</u>
<b>Investment Maturities of Fixed Income Securities</b>	
One year or less	\$ 31,128
After one through five years	55,662
After five through ten years	31,333
	<u>\$ 118,123</u>

Estimated fair values have been determined by WCHCC using appropriate valuation methodologies by third parties, quoted market prices, and information available to management.

WCHCC categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in advance markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. At December 31, 2019 all of WCHCC's financial instruments measured at fair value were categorized as Level 1.

*Custodial credit risk - investments* - is the risk that, in the event of the failure of a counterparty, WCHCC will not be able to recover the value of the investments that are in that counterparty's possession. WCHCC's investment securities are exposed to custodial credit risk if the securities are uninsured and unregistered and held by the counterparty, or by its trust department or agent, but not in WCHCC's name. At December 31, 2019, all investments are either insured or held by WCHCC or its agent in WCHCC's name and, therefore, are not exposed to custodial credit risk. Accordingly, WCHCC's investment policy does not address custodial credit risk for investments.

*Concentration of credit risk* - is the risk of loss attributed to the magnitude of WCHCC's investment in a single issuer. There is no limit on the amount WCHCC may invest in any issuer. WCHCC's investments are diversified and are not currently exposed to this risk.

*Interest rate risk* - is the risk that changes in interest rates will adversely affect the fair market value of an investment. WCHCC invests in fixed-rate debt and US Treasury securities with primarily one to seven year maturities.

*Credit Risk* - is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. WCHCC's investment policy allows for up to 10% of investments in Baa/BBB Bonds.
